

Senior PHP/Magento Developer – Live Concepts.
£20,000 - £25,000pa DOE
Truro, Cornwall

Aim:

Live Concepts is looking for an experienced PHP Developer to join our highly professional team. The successful candidate will be responsible for the technical delivery of multiple high specification websites with a focus on eCommerce using the Magento e-commerce software platform for a range of business both locally & national. They will be working with our Web Project Manager and be responsible for a team of junior PHP Developers for whom they will be responsible.

The Company:

Live Concepts are a knowledge based eBusiness consultancy that provides advice and guidance to companies wishing to establish a presence or develop their presence on the internet. They offer an initial audit and needs analysis, agency selection, project management, website development and conversion rate optimisation services for their clients. Established in 2007 the business has established a strong list of clients and is now set to embark on a strong period of growth. This project will support this growth and ensure that capacity grows and quality of service remains exceptional.

Objectives:

- To work with our web project manager to scope projects and assign tasks to various members of the development team.
- Take ownership of the development of all projects and be responsible for their technical delivery
- To increase productivity by reducing development time & increase efficiency
- Develop and extend functions predominantly for eCommerce sites using Magento e-commerce software platform & integrating CMS platforms such as Joomla & WordPress.

Nature of work undertaken:

We work with clients who demand the best on a technical level & from graphic design, usability & optimisation. Therefore you will be responsible for working with our graphic design & conversion rate optimisation team converting all their work onto specific platforms ensuring that all technical development is implemented to to equally high standards.

Required Personal skills and qualifications:

Essential Requirements:

- 5+ years programming experience
- Expert understanding of XHTML/PHP5/CSS/JavaScript/XML/Ajax/MySQL/
- Demonstrate experience of developing on Magento
- Apache Hosting knowledge
- Excellent organization, time-management & communication skills
- Ability to write programming specifications and documentation

Desirable Requirements:

- Zend Framework Experience
- Experience on Photoshop/Flash
- Experience of working in an agency as part of a team
- Experience developing on Joomla & WordPress

This post is for Graduates Only and a permanent position for a career minded candidate
